

# DORMITORY EVACUATION PLAN

## EVACUATION PROCEDURES:

1. Safely stop your work.
2. Plan what to take. Many families choose to have a "go bag" ready with some of these critical items.
3. Gather important documents.
4. Leave the building through the nearest door with an EXIT sign
5. Wait for instructions from emergency responders.
6. Learn about your emergency exit routes.

## EMERGENCY GO BAG

A bug out bag or go bag serves as a portable kit intended to help a person or family survive the next 72 hours after evacuating their homes in the event of a hurricane, earthquake, and other types of disasters. There should be things that compensate for your senses limitations.

If you need to leave from your home, it will be important that you are ready to go as quickly as possible. Having a Go Bag in an accessible place ensures that you and your family are prepared for whatever situation arises.

# FOOD AND MEDICINE

**FOOD** – canned and other instant food are essential in cases like this. This will keep yourself from hunger and still get the energy to keep on going.

**MEDICINE** – This will help you or others around you to provide medical assistance caused by the natural phenomenon at hand.

# FIRST AID AND SANITATION

**FIRST AID** – inside this kit includes essentials that can help an injured person. Even without a doctor to rescue, with the help of having first aid kit is already a big help to the person who was injured.

**SANITATION** – in giving proper medical assistance it is important to sanitize to prevent the bacteria from reaching an open wound. It can also be used to sanitize yourself from all the dirt that has reached on your body.

## EXTRA CLOTHES AND BLANKET

**EXTRA CLOTHES** - packing extra clothes are also important in evacuating. If ever you got damped from the rain, you can change clothes and undergarments to prevent you from having a cold.

**BLANKET** - this will keep your body warm, you can also use this as an alternative to a bed if ever you got stranded somewhere.

# COMMUNICATION AND SAFETY ESSENTIALS

**POWERBANK** - this will be helpful mostly if you got lost with your companions. You won't run out of battery for a couple of days and can use your smartphone for a couple of days.

**PHONE**- a smartphone can be used to contact relatives, emergency, and a radio. Do not over-rely on this to keep your phone last for a couple of days

**SCISSOR AND CUTTER** – used to cut bandages or gauze. Perfect to keep in your emergency Go Bag.

**TAPE AND ELECTRICAL TAPE** – Gauze or other first aid products may be kept in place by tape.

**PORTABLE LAMP** - having emergency lighting available is critical to helping you navigate the darkness.

# IMPORTANT DOCUMENTS

**IMPORTANT DOCUMENTS** – do not forget to pack up your important documents such as Birth certificates, passports, and others. This will help you be identified and process legal activities that you might encounter in the future.

# VEGETABLE GARDEN

Mung bean

Onion

Potato

Ginger

Garlic
