

Name: Angelica L. Paulo (BSCS1)

Ideal Community

My ideal Community

The community that I have created has an access to education, health care, businesses and a lot more. The park was position to the center that could help the people of the community unwind and relax to also keep their mental health stable, The park could also serve as an evacuation center in case of an earthquake to prevent falling debris from higher buildings. A basketball and Volleyball court was placed at the park for the physical health of the people. There is also a church at the top of the park and complete markets for the needs of the community. There are services available for the community to better aid them with their daily needs and police stations were place in the different area of the community in case of emergency. My ideal community is a place where unity and justice are valued and differences are accepted.
