

**NATIONAL SERVICE TRAINING PROGRAM**

IDEAL COMMUNITY

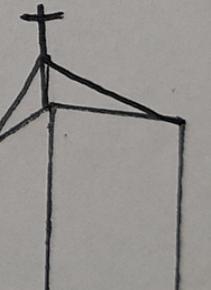

As we emerge to a modern and digital age, and as the population increase, the world lacks space to occupy for shelter and room to work. Skyscrapers and high buildings are now essential. I want a community that shall observe a green environment. A community that is composed of 50% green and 50% buildings. This will show the interaction of buildings with nature. We should also use wind as our aircondition to lessen the effect of Climate Change due to Carbon emission. A community idea like Bonifacio Global City, Nuvali, and New York city.

In term of Social well-being, NO DISCRIMINATION of Race, gender, and of part shall take place. It shall value amity and help one another to grow. This community should be grounded by principles and not be defined by social status. The ideal concept of a free society in the Modern World.
